

Churchyard walk with Clare Bishop
Hants Wildlife Trust

Feb: 1st 2000

Discussion on Bat Boxes in groups of 2 or 3
Plenty of space in front of Boxes.
~~The~~ Job with plastic covered wire, not nails.

Various Tree sites possible 1 on East end of
Churchyard.

But a larger number at West end.

SDM has list of possible sites.
Someone to make Bat Boxes using
design on leaflet.

Wood must be untreated. Keith can
obtain off cuts for free. Can house them in
my garage. S.D.M. ask Chipper to make?
Bardboxes easier to site & to make.

New Education Park on Nature, just out.
Clare would come to the Churchyard ^{Not the School} and
Take the children round (5s to 11s) Primary
Schoolage. Summer Term for choice. She
suggested one of us saw Headmaster (Mr ?)
Wasn't sure that it ~~was~~ ^{would be} possible?

She got very excited over the holes in the
Banks of the Cut - maybe Water Voles now
endangered ~~endangered~~ species. She can do my bank anytime
call her on the day. McKimlane if he can see

Clare was very happy with every thing.
We went into the Church & found that the
Scrotine Bats had moved to a bigger roost space
Over the High altar — The Long eared Bats
had gone into the Lady Chapel & the Pipistrelle Bats
were, as they have always been, at the West End.
The Scrotines were squeaking quite audibly.

Frank

Are you seeing John Rendle?
